

João **Quintanialha**

Full-stack Dev · Backend Dev · Blockchain Dev

(+41) 762 030 416 | jpquintanilha@protonmail.com | www.jpquintanilha.com | quintanilha6 | quintanilha6

Summary

I'm João Quintanilha, a 32-year-old Software Developer with an MSc in Computer and Telematics Engineering. I could list all the usual buzzwords — proactive, problem-solver, dynamic, resourceful — but let's be honest, ChatGPT already does that better than anyone. In reality, I'm just a simple guy who enjoys building things that work, solving real problems, and helping a team stay balanced and happy along the way. I may not be a rocket scientist, but you can count on me to work hard and aim for something meaningful. Ping me if you'd like to know more — I'm always up for a good chat.

Work Experience

Swiss Post

Bern, Switzerland

Software Developer — *May. 2021 - Current*

At PostIT, I am part of the International Mail and Parcels (IMP) team, developing and maintaining services that handle international shipments. Our core product, Frachtbrief online, is built with Java and Spring Boot, deployed on AWS using Docker containers and ArgoCD, and used daily by thousands of customers to create international waybills. I actively participate in all stages of the software development lifecycle — from requirements analysis to deployment and production monitoring. In addition to backend development, I contribute to improving CI/CD pipelines with Jenkins and GitHub, maintain an extensive test automation suite in Robot Framework, and support team processes through activities such as recruitment, onboarding, and Scrum Master deputization.

CERN

Geneva, Switzerland

Software Developer — *Apr. 2021 - Apr. 2023*

Within CERN's Experimental Physics Department, I worked on the control systems of the Compact Muon Solenoid (CMS) experiment, one of the world's largest and most complex detectors. I was responsible for maintaining and enhancing several web applications in the cmsonline ecosystem, used for monitoring, operations, and access management across CMS subsystems. My work focused on backend development with Java and Oracle Application Development Framework (ADF), deploying to Oracle WebLogic servers. I also contributed to the gradual migration of legacy components to Spring Boot and provided technical support to users, troubleshooting issues and clarifying operational questions.

Bosch Security Systems

Ovar, Portugal

Software Developer — *Jul. 2020 - Mar. 2021*

As part of the first international team for Bosch Smart Home outside Germany, I contributed to building interoperability between Bosch Home devices and third-party ecosystems. I developed integrations enabling voice control features — such as opening or closing shutters and door locks — through Google Assistant and Amazon Alexa. Most of the work was done with Spring and Vert.x, within a large-scale CI/CD environment powered by Jenkins. I collaborated closely with cross-functional teams following the Scrum framework to deliver high-quality, production-ready features in an IoT context.

Ubiwhere

Aveiro, Portugal

Backend and Blockchain Developer — *Mar. 2018 - Jun. 2020*

At Ubiwhere, I helped design and develop decentralized architectures and smart-contract–based platforms for blockchain interoperability. I built dApps using Solidity, Truffle, and Web3, integrating them with public Ethereum networks over HTTPS. I also designed and implemented RESTful APIs in Python (Falcon) and Java (Spring), virtualized backend services and databases (PostgreSQL and MySQL) using Docker, and contributed to defining data synchronization strategies between traditional databases and blockchain ledgers for hybrid applications.

Education

2012 - 2018	**MSC & BSc Computer and Telematics Engineering**, University of Aveiro	*Aveiro, Portugal*
2017 - 2018	**MSc Software Engineering and Information Systems (Erasmus+)**, University of Zagreb	*Zagreb, Croatia*
2016 - 2017	**BSc Information Technologies (Erasmus+)**, University of Silesia	*Katowice, Poland*

Certificates & Awards

2024	**Apache Kafka**, Learn Apache Kafka for Beginners v3	*Udemy*
2024	**Languages**, German Certificate A1/1	*Flying teachers*
2023	**Health**, First Aid - Life Saving Actions	*CERN*
2022	**Scrum**, Professional Scrum Master I (PSM 1)	*Scrum.org*
2021	**Languages**, French Certificate A2.1 (CECRL)	*Supercomm Group*
2020	**Docker**, Docker Mastery: with Kubernetes + Swarm	*Udemy*
2020	**Java**, Advanced Springboot Development	*Udemy*
2019	**Blockchain**, Dyagora technical pitch - Blockchers H2020 funded project	*Budapest, Hungary*
2019	**Health**, Basic life support	*Aveiro, Portugal*
2018	**Blockchain**, Blockchain Development on Hyperledger Fabric using Composer	*Udemy*
2018	**Blockchain**, Ethereum and Solidity: Developer's Guide	*Udemy*
2014	**Languages**, First Certificate of English (FCE)	*Aveiro, Portugal*

Languages

Portuguese → Native speaker
English → First Certificate of English (FCE)
French → Limited working proficiency (A2.1)
German → Limited working proficiency (A1)
Spanish → Limited working proficiency

Competency Matrix

Beginner (1) → Academic
Intermediate (2) → Online and certificated training
Advanced (3) → Personal project experience
Professional (4) → Professional experience
Expert (5) → 5+ years of personal and professional experience

Languages / Frameworks	
Java (Spring)	5
Python (Falcon, Django, Flask)	4
Javascript/Typescript (Node, ReactJS, Angular)	4
HTML and Styling (CSS, SASS, Bootstrap)	4
Robot Framework	4
JUnit and Mockito	5
Databases + ORMs	
Postgresql	5
Oracle	4
Hibernate	5
SQL Alchemy	4
SQL Server	4
Others	
Git (Bitbucket, Gitlab, and Github)	5
CI/CD (Jenkins, Github Actions)	5
Linux OS	5
Containerization and Orchestration (Docker, Docker-compose, Kubernetes, ArgoCD)	5
AWS Services (S3, Lambda, DynamoDb, Terraform configuration, etc)	4
Stream Processing (Apache Kafka)	4
